walling built better

Landmark project uses benchmark walling

77 Jane Street, West End QLD 4101

Bohemia built on a standard

While this project's builder could adapt to any kind of construction as needed, they were resolute on their choice of materials. It had to be best-in-class for the job and come from a supplier with a reputation equal to theirs. AFS Logicwall® ticked all the boxes for Bohemia.

Our customer says...

Floored by the walling

The logicwall® system was incorporated into the design by the specifying engineer so as its extremely fast program for lift/stair-core and load bearing blade walls could be met. The result was a very open plan for each unit in this high end location at West End.
