CAMPBELLTOWN TRAIN STATION UNDERPASS

SAB901 Channel

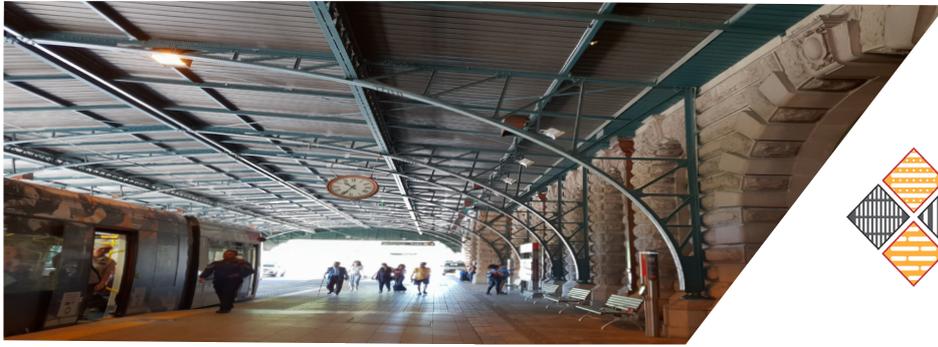

- 304 Stainless Steel Wedge Wire Grate
- Heel Guard
- Class A Rated
- 100mm x 100mm x 1000mm
- Anti-Theft Lockdown

Campbelltown City Council's recent upgrade of the Hurley Street pedestrian underpass required a suitable grated drainage system that would suit the aesthetics, handle the heavy foot traffic of the refurbished walkway and provide a solution for collection of excess surface water.

With heavy footpath traffic and cyclists, the SAB904 stainless steel wedge wire grated channel was ideal with its stylish and appealing look to compliment the gateway to and from the city. The Sabdrain 904 met the specification as it is class rated. The channel is complete with anti-theft locking bolts and a slip resistant surface and a heel guard.

With SABDrain's rated polypropylene channel, offering maximum versatility and delivering a lifetime of low maintenance, this redevelopment is now ready to compliment the city of Campbelltown.

CENTRAL STATION

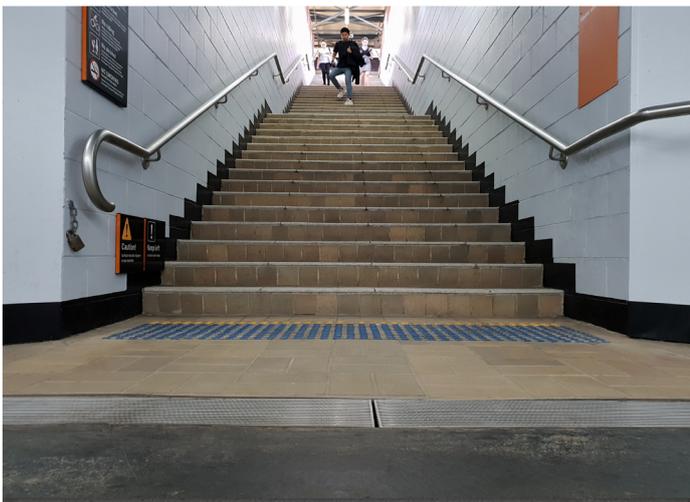

SAB904 Channel

- Anti-slip
- Anti Theft
- 300mm x 300mm x 1000mm

The Central railway station is a heritage listed railway station located at the southern end of the Sydney central business district in the city of Sydney.

Major construction work on this station included the Sabdrain 904 300x300mm stainless steel antislip lockdown channel. This was custom made for Reece Civil Taron Point to supply for the job requirements.

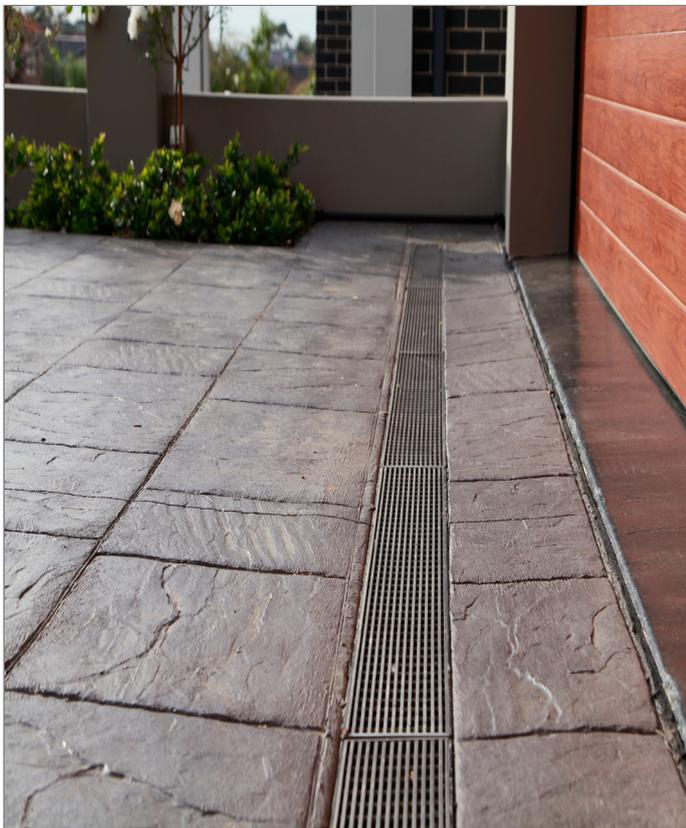

Priority was given to the stainless steel wedge wire grate having antislip nodules, giving the grate superior grip. This 304 stainless steel grate offers durability, strength and a aesthetically smart looking piece, all requirements of the Central Station brief.
