BONNYRIGG HIGH SCHOOL

SAB704

- Cast Iron Grate
- Anti Theft
- 300mm x 200mm x 1m

Bonnyrigg High School, situated in Greater Western Sydney, aims to provide quality teaching and learning through an inclusive and challenging curriculum, where students develop as effective & responsible global citizens who value life-long learning. One of the schools initiatives was opening Australia's first community first aid centre on the public schools grounds. The facility has two treatment rooms, a mezzanine storage area and undercover parking for a first aid/ambulance vehicle.

As part of an update to the area around the centre SABDrain's 704 was installed to aid in water drainage around the building, including the alley and at the back of the building. The dip in the alley between 2 buildings as well as behind the building was causing flooding resulting in slip hazards for students & teachers. Over the school holidays, the 704 was installed by RDB Plumbing Services. With the channels easily click-clacking together, the job was easily finished before the students returned to school. SABdrain's lockdown 704 channel & grate was the perfect option for the school's first aid centre as it is Class D which ensures the grate is able to withstand vehicles that may drive over the grate. This 300mm x 200mm polypropylene channel allows for a greater flow capacity allowing rapid discharge of water.

PULLMAN HOTEL SYDNEY AIRPORT

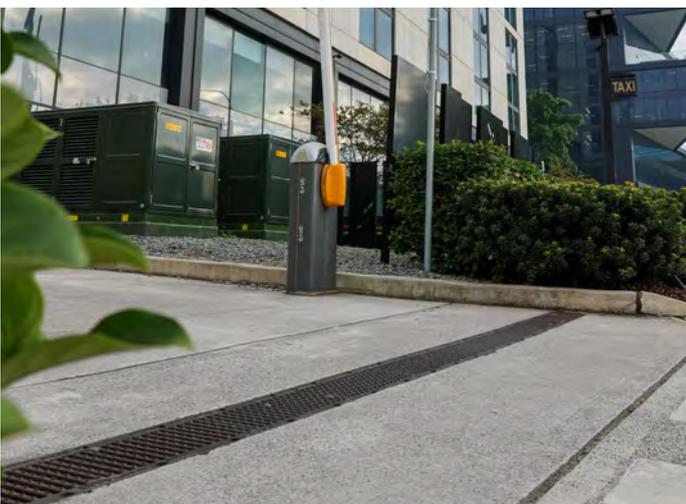

SAB704 Channel

- Class C & D Rated
- High Strength Cast Iron Grate
- 200mm x 200mm x 1000mm

The Pullman Sydney Airport hotel is the only 5 star hotel at Sydney Aport, offering 229 rooms and suites with a smart open layout and all-round connectivity.

The delivery driveway has the SAB704 drainage system installed, providing ultimate durability for design and functionality of any drainage channel available to the civil market. This rated channel and grate has been utilised for the purpose of heavy commercial vehicles, which will be driving within the delivery dock of the hotel.

SAB704's tough and secure 8 point system allows the Pullman Hotel to commence its fast paced daily activities.

NATRAD OAK FLATS

SAB704 Channel

- 8 Point Security System
- High Strength Iron Grate
- 150mm x 150mm x 1000mm
- Class C & D Rated

Natrad Oak Flats recieved a new look, with the SAB704 drain installed, enabling slow moving, heavy vehicles to travel over it smoothly.

This class C and D rated drain was the ideal selection for their constant automotive check-ups and services. With 26M of 704 supplied by Reece Albion Park, SABdrain was the ideal product to meet the requirements of the job.

‘With trucks and cars running over it, works fine’

MARULAN VILLAGE CENTRE

SAB707 Channel

- Cast Iron Heel Guard Grate
- Anti Theft
- 200mm x 200mm x 1000mm
- Class D

This fast growing town of Marulan in Goulburn Mulwaree has recently gained a \$4 million development of a new commercial hub.

Marulans Village Centre development, which has transformed the town, required a Cast Iron Heavy Duty grate in its driveway not only catering for the shopping centres car traffic but also the trucks that make the stop.

SABDrains 707 200 x 200 x 1000mm Class D rated channel was installed on the centres driveway, leaving an aesthetically smart looking channel and grate whilst shifting the flow of water off the driveway with ease. An anti-theft system prevents unlawful access or theft.
